**Subject:** RE: MLPAComments: Preservation of Marine Sanctuary in Monterey and Carmel

Melissa, I tried this number—sounds like a private line.

Was my message to support the Marine Sanctuary Package 2 and to vote "NO" to S or any sport spear fishing/no to commercial fishing/ kelp harvesting access from Break Water around to Carmel conveyed?

I have been diving in Monterey since 1975. The diminished fish population in Monterey/Carmel is sad and disheartening to the well-being of the ecosystem there.

I bring my family members when I dive year round. We stay in local lodging, eat lots of meals and shop. I live and work in Oakland and regret I am unable to attend today's important meeting.

I want to protect marine life and believe in giving to the local communities through our visits.

Ed Cooper gave most of his life efforts, zealously, for a number of his final years to preserve this area for the future. I would hope that if we are not all such visionaries, we learn and take heart from those who are to protect the great resources that abide in the Monterey/Carmel oceans.
